

## European Space University for Earth and Humanity

*UNIVERSEH is an alliance of five European universities established to develop a new way of collaboration in the field of Space, within the “European Universities” initiative.*

*The alliance aims to create new higher education interactive experiences for the university community, teachers and students, and for the benefit of society as a whole. Such initiatives will enable broadminded, informed and conscientious European citizens to capture and create new knowledge and become smart actors of European innovation, valorisation and societal dissemination within the Space sector, from science, engineering, liberal arts to culture.*

Grant agreement number: 101004066

Funding Scheme: Erasmus+ / European Universities

### D 2.6 MOPLAT section on UNIVERSEH website

Due date of deliverable: M6  
Actual Submission date: 29/04/2021

Start date of the project: 01/11/2020

Duration: 36 months

Organisation responsible for this deliverable: UDUS

*Version: final*

### I. MOPLAT section on UNIVERSEH website

In order to provide coherent information corresponding to all partnering universities and respective mobility information, the project's [mobility platform "MOPLAT"](#) was successfully set up. The landing page of the section allows the User to follow the journey and start planning his/her adventure implementing a dual nature of audience targeting, as can be seen in slide 1 below.

← *MOPLAT section*

← *The User can select which audience s/he identifies with and then receives further information clicking either of the two buttons.*

### III. Sections suited to the audience

As outlined in D2.5, MOPLAT is designed for students, researchers and staff. Accordingly, these define the targeted audiences to which information is provided, as can be seen in slide 2 and 3 below. Regarding the infrastructure of the MOPLAT section, the underlying web design concept follows the same structural principles of a scroll-down presenting first the headline of the section, followed by the different university profiles allowing to choose the user where to start his/her mission. Finally, the integrated interactive map presents the alliances' locations and allows the user to geo-locate UNIVERSEH him/herself whilst simultaneously displaying the entire alliance at once.

University profile

UNIVERSITÉ FÉDÉRALE TOULOUSE MIDI-PYRÉNÉES

Founded in 1229 and situated between the Mediterranean Sea, the Atlantic Ocean and the Pyrenees Mountains, the University of Toulouse (UT) is an organisation gathering 31 higher education and research institutions in the Toulouse education authority sector. 5 of these institutions take part in the UNIVERSEH project: 2 universities (Toulouse III-Jean Jaurès University, Toulouse III-Paul Sabatier University), one engineering school (ISAE SUPAERO), one research and industry-oriented University (Institut National Polytechnique de Toulouse) and one Business school (Toulouse Business School). Together, they cover a range of subjects: Arts, Literature and Languages, Law, Economy and Management, Humanities and Social Science, Science, Technology and Healthcare and Science and Technique of physical and Sports Activities.

Once the user has decided on which university s/he would like to receive further information by clicking on the university logo, s/he is redirected to the profile of the selected university, as can be seen in slide 4. The same mechanism applies for both student and staff & researchers subpages of the MOPLAT section. Additionally, within each university profile, the user can select with which step of the future mobility adventure to start. A click on one of the three orange icons automatically redirects to the related information.

A global and harmonized offer in terms of support services shall be accessible for future students, staff and researchers participating in UNIVERSEH. As this endeavour is a moving target, this also means that the information provided so far might be subject to web-edit changes and developments in other working packages of the project. Regular updating of the information provided on the MOPLAT section of the UNIVERSEH allows the user to stay informed and updated. A future version of MOPLAT may include central parts translated in different languages, however as the current website is set up in English and the common language of the alliance is English, MOPLAT currently does not offer other language options.
