

## European Space University for Earth and Humanity

*UNIVERSEH is an alliance of five European universities established to develop a new way of collaboration in the field of Space, within the “European Universities” initiative.*

*The alliance aims to create new higher education interactive experiences for the university community, teachers and students, and for the benefit of society as a whole. Such initiatives will enable broadminded, informed and conscientious European citizens to capture and create new knowledge and become smart actors of European innovation, valorisation and societal dissemination within the Space sector, from science, engineering, liberal arts to culture.*

Grant agreement number: 101004066

Funding Scheme: Erasmus+ / European Universities

### D 2.14 Report UNIVERSEH going digital

Due date of deliverable: M10 2021  
Actual Submission date: 27/08/2021

Start date of the project: 01/11/2020

Duration: 36 months

Organisation responsible for this deliverable: UDUS (Heinrich Heine University Düsseldorf)

*Version: final*

### I. Current practices in “going digital”

The European Commission has set the objective that by 2025, all students should be able to enjoy the benefits of digital mobility considering their student status by implementing the European Student Card and their seamless mobility across European universities (EWP, Online Agreements, MyAcademicID etc.). New tools have been suggested by the European Commission to facilitate the digitalisation of processes related to student enrolment, the exchange of student data, participation in academic exchanges and the transmission of relevant documents and credit data between relevant departments at cooperating universities.

UNIVERSEH – European Space University for Earth and Humanity is an alliance of

Concerning the new E+ generation 2021-2027, all partners of the UNIVERSEH alliance are committed to move the digital transmission forward.

## II. Foundation of the “EWP Community of Practice”

During the regular working group meetings of WP2, the current practices in going digital have been discussed among personnel of all five partnering universities. Some common tools that have been successfully integrated for digital administration and management of exchange and mobility related data have been identified. The tool MoveOn is used for key functions such as managing data related to international partnerships, mobility, scholarships (Erasmus and other mobility grants) and retrieving statistics. An interface to the [EU dashboard](#) to integrate the [OLA](#) (Online Learning Agreement) is currently used to exchange data between the faculty's erasmus coordinators' and students for finalising exchange information. Full integration of the OLA is targeted for 2022.

The process and concrete technical realisation of implementing the new tools is ongoing, however, the new tools prescribed by the Erasmus+ Program for the 7-Year Plan (EWP, OLA, MyAcademicID etc.) has raised many operational questions to those responsible of the project as clear instructions and available functioning tools and templates are awaited.

Taking the aforementioned into consideration, the foundation of an EWP Community of Practice has been brought forward in the mobility working group and received nothing but support as the outline is very community-oriented and focussed on providing a collegial environment

## III. Process of implementation

Discussion ongoing in the working group.
