

European Space University for Earth and Humanity

UNIVERSEH is an alliance of five European universities established to develop a new way of collaboration in the field of Space, within the "European Universities" initiative.

The alliance aims to create new higher education interactive experiences for the university community, teachers, and students, and for the benefit of society as a whole. Such initiatives will enable broadminded, informed, and conscientious European citizens to capture and create new knowledge and become smart actors of European innovation, valorisation, and societal dissemination within the Space sector, from science, engineering, liberal arts to culture.

Grant agreement number: 101004066

Funding Scheme: Erasmus+ / European Universities

D5.2: Development plan for UNIVERSEH curriculum in entrepreneurship and Innovation with a focus on Space field

Due date of deliverable: M20
Actual Submission date: 05/07/2022

Start date of the project: 05/07/2022

Duration: 36 months

Objective

A catalogue of courses on entrepreneurship and innovation available at partners' universities have been established previously, which depicts the landscape of entrepreneurship-related courses in the partner universities.

Our primary goal is to develop and offer a group of courses to our students which fulfils the following criteria:

- Space is the sectorial activity of UNIVERSEH knowledge transfer
- The NewSpace economy is a complete gamechanger in the socio-economic approach of space in Europe and worldwide
- Classic entrepreneurship and innovation do not include this new dimension of NewSpace or also called entrepreneurial space, represented by companies such as [Orbital](#) (now retired), [Sierra Nevada Corporation](#), [Northrop Grumman Innovation Systems](#), [SpaceX](#) and a multitude of SMEs and start-ups.

Hence, to prepare our students to the NewSpace paradigm and economy, our intention is to design, develop and propose a set of courses incorporating entrepreneurship, innovation, and practical sessions.

Erasmus+ Programme
of the European Union

Output

The analysis of the existing curricula and of the learning objectives of the courses led to the design of a new 5-ECTS Teaching & Learning module called “Entrepreneuring in space industry” (130 hours/student workload). This proposal was discussed and finalized during the first semester of 2022, through online meetings and an extensive final session in Krakow on 1st and 2nd June 2022.

The process was assisted with an instructional designer and an expert in innovative methods for teaching & learning.

The concurrent design of the module “Entrepreneuring in space industry” plans the following courses:

- Space economy: past, present, and future
- Foundation courses
- Team ideation
- Entrepreneurial project and monetization
- Protecting and funding Minimal Viable Products
- Presentation and assessment

The comprehensive characteristic of the module is its interdisciplinarity when using a business and engineering approach to combine different fields of study. The student body will be composed of students from Business, Engineering, Humanities and Social Sciences.

Likewise, multilingual approaches to enhance the learning of languages, promote plurilingualism and intercultural education will be incorporated into the module through three distinctive channels. The first approach is to use digital tools to add captions/subtitles to videos and lectures, the second one is to provide student support and mentoring in different languages, and the third one to provide resources and supporting material in different languages.

Dissemination

On behalf of the group, Peter Törlind presented the work package production at Sweden's largest conference and meeting place for everyone with an interest in higher education pedagogical education and development, [NU 2022 Conference](#). The Swedish University and College Association (SUHF) is behind the conference.

P. Törlind (2022) *Designing student-centred learning for students with heterogeneous backgrounds – Implementation in an entrepreneurship and innovation course in the European University UNIVERSEH*, NU 2022 Conference, June 15-17, 2022.

In conclusion, the development plan for a course in Space and New Space entrepreneurship is set, to allow the implementation of a full 5-ECTS module in September 2023 within the partner universities.

EUROPEAN UNIVERSITY INITIATIVE

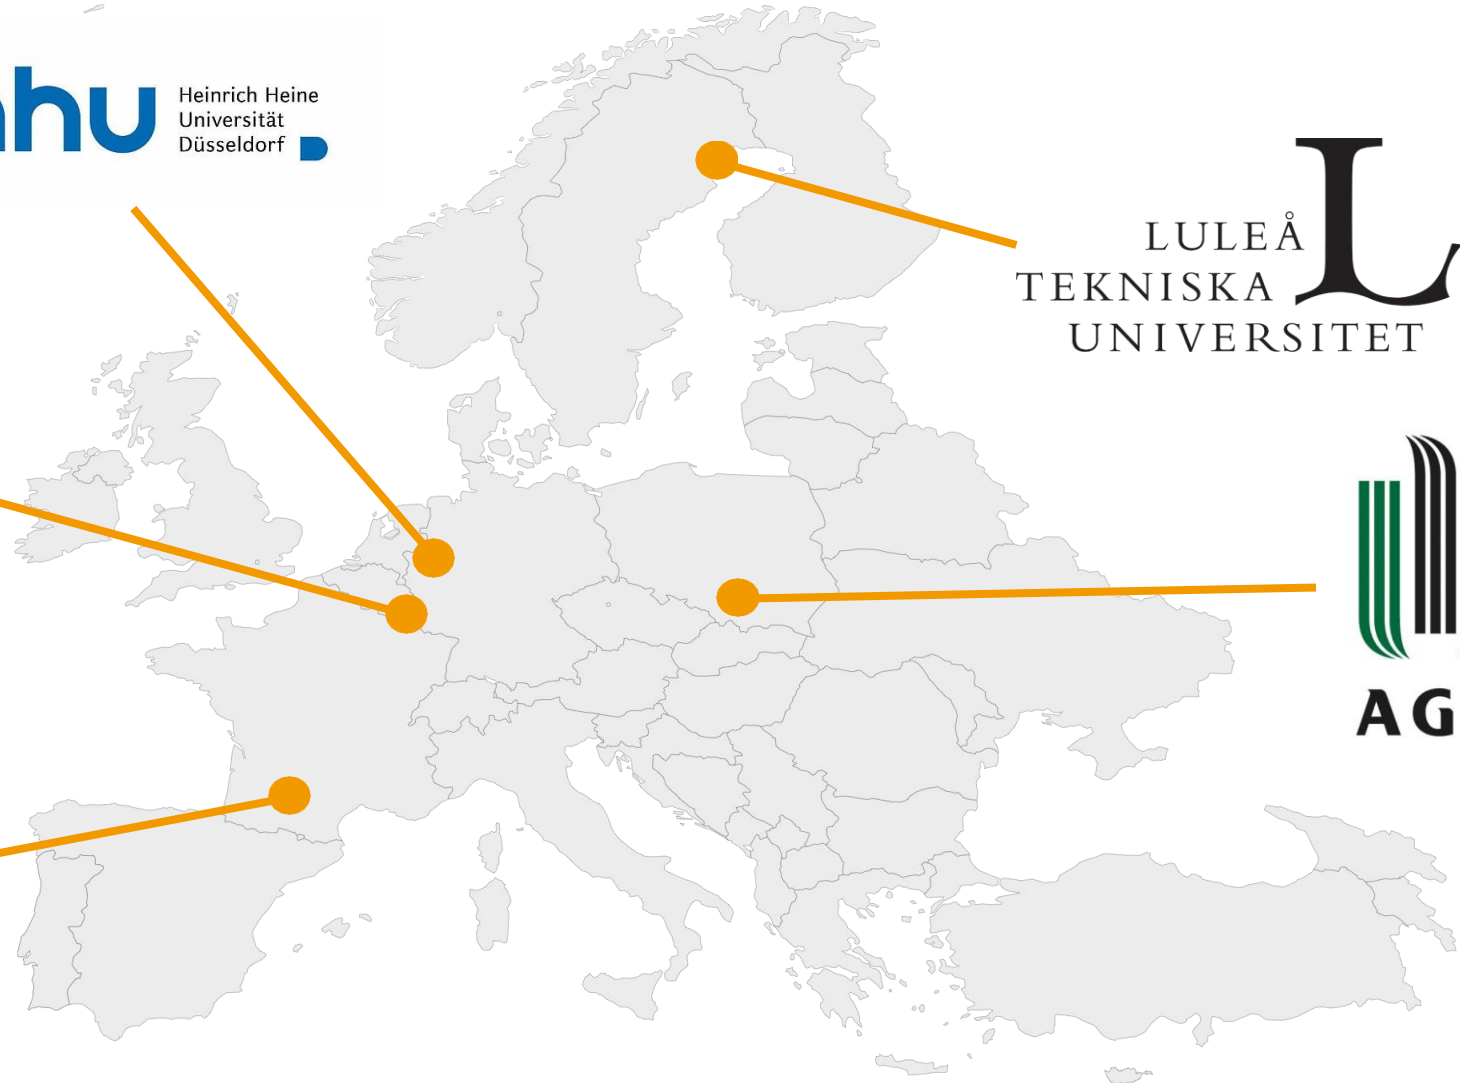

***EU Funded initiative
through Erasmus+***

41 Consortia in Europe

*“Increase international competitiveness
of European higher education and bring
Europeans together”*

UNIVERSEH – EUROPEAN UNIVERSITY INITIATIVE

CHALLENGE

- *Students from five universities/ countries*
- *Different faculties – Engineering, Business, Law, Social science, Humanities...*

Students come to the course with different prior knowledge, pedagogical experiences, attitudes, interests, preferences, strengths and weaknesses.

PEDAGOGICAL CONCEPTS

Student-centered learning where students take active responsibility for their learning process.

- *Active learning*
- *Micro credentials*
- *Student as a teacher*
- *Multi disciplinary teamwork*

HETEROGENOUS BACKGROUNDS

After university most professionals will work in multidisciplinary or interdisciplinary teams.

Multidisciplinary: *people from different disciplines working together, each drawing on their disciplinary knowledge.*

Interdisciplinary: *integrating knowledge and methods from different disciplines, using a real synthesis of approaches.*

HETEROGENOUS BACKGROUNDS

After university most professionals will work in multidisciplinary or interdisciplinary teams.

Unfortunately we do not train our students for this!

HETEROGENOUS BACKGROUNDS

*Students need to be **aware** of others expertise and competences.*

*Students also need to have an **empathy and respect** for others expertise.*

*And we need a **common ground** to been able to interact*

CREATING COMMON GROUND

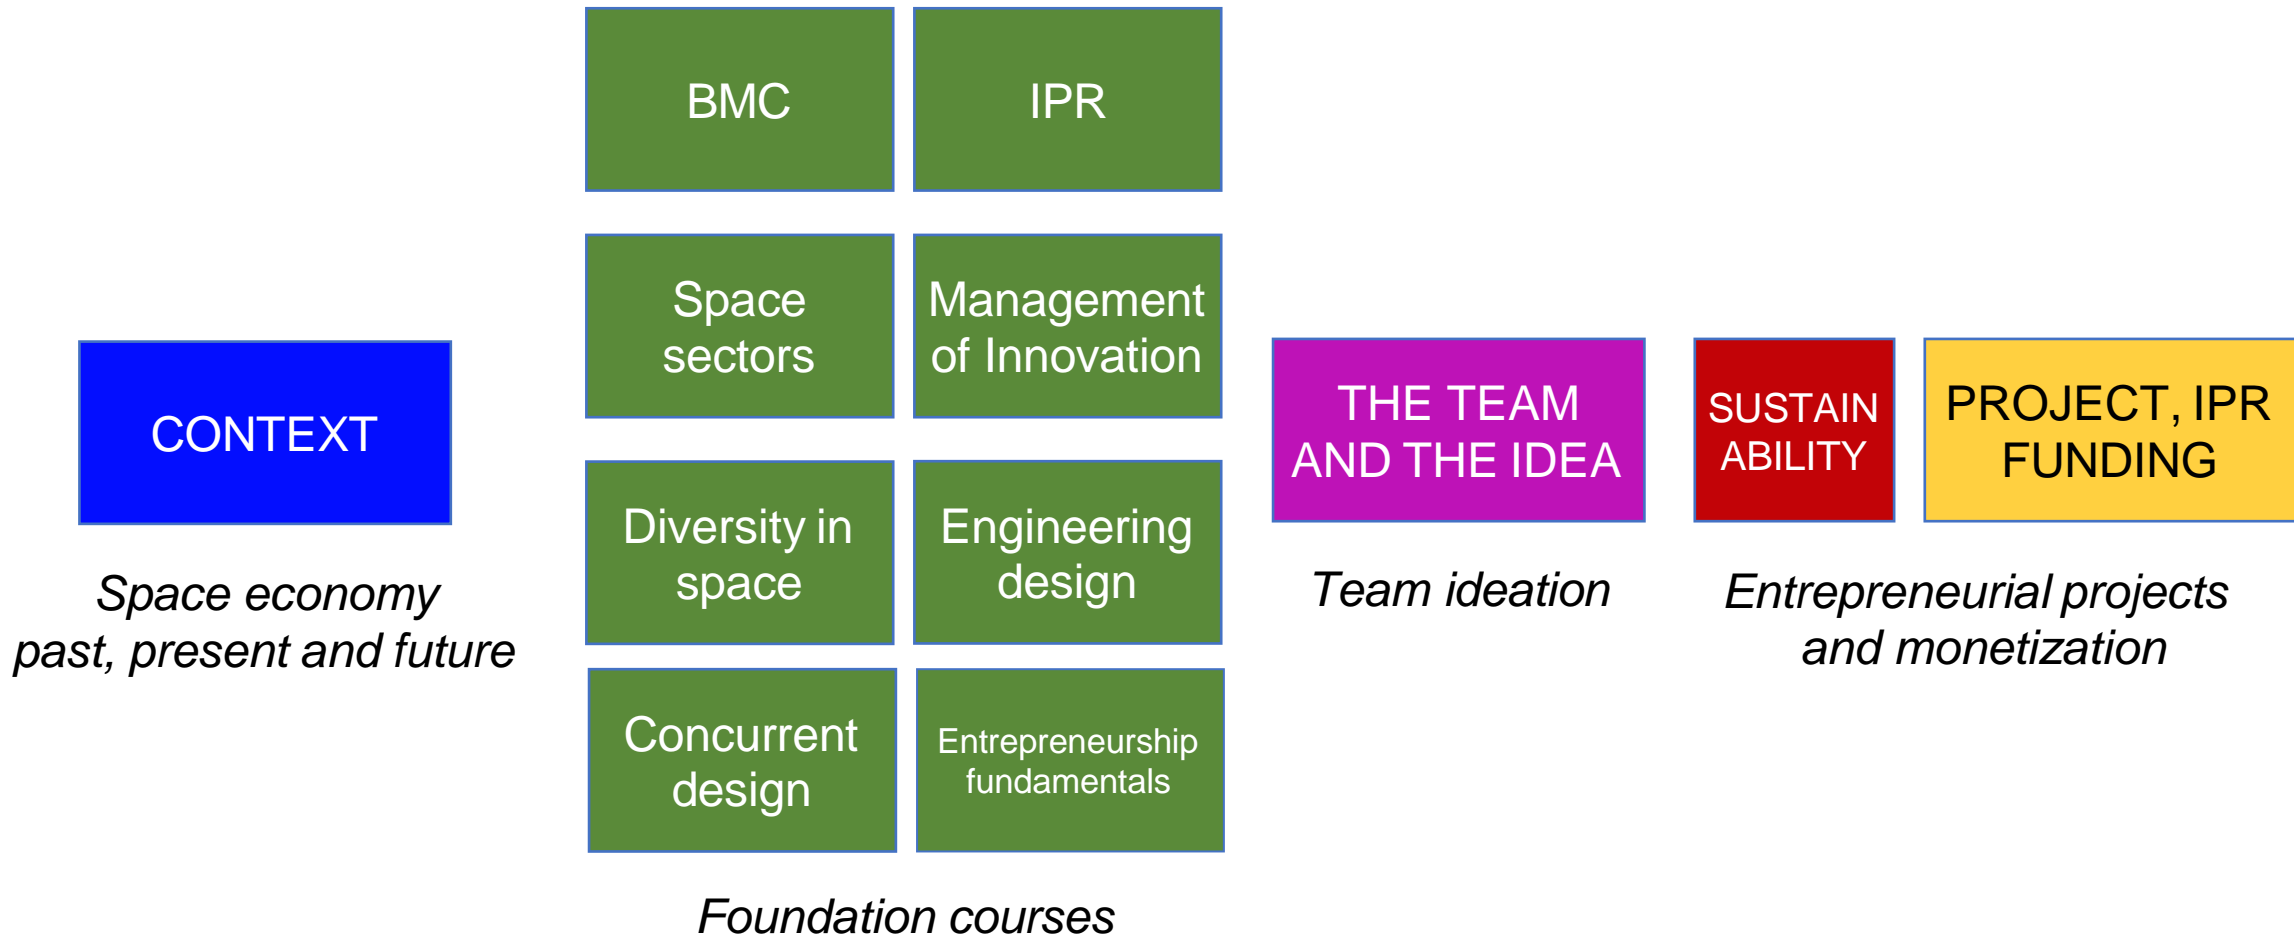

To be able to meet and discuss things it's important that all members in the team understand each other.

"Grounding refers to the interactive process of making sure that what is communicated is also correctly understood."

Clark and Brennan, (1991)

MICROLEARNING

Aerospace digital nuggets

"The nuggets are small (less than 45 min learning time) chunk of interactive knowledge"

The screenshot shows a video player interface for a microlearning module. At the top, there is a header with the logo 'μ-learning', a language dropdown set to 'English (en)', a search icon, and a 'Guest access (Log in)' button. The main content area has a title 'We propose here to look at some particular transversal balance flight cases.' followed by a sub-section 'The ball indicator'. Below this, a paragraph states: 'First of all, we want to take a deeper look at the ball indicator, as it doesn't indicate sideslip, despite some call it a "slip indicator".' The video title 'Transversal balance' is displayed above the video frame. The video frame shows a man in a blue shirt speaking. To the left of the video frame, there is a list of bullet points: '• Is the ball a slip/skid indicator ?', '• Steady Heading Sideslip', and '• Turn and spiral stability'. At the bottom of the video frame, a subtitle reads: 'We propose here to look at some particular transversal balance flight cases.' The video player controls at the bottom include a play button, a progress bar showing '0:05 / 3:58', and icons for full screen, volume, and settings.

μ-learning English (en) Guest access (Log in)

We propose here to look at some particular transversal balance flight cases.

The ball indicator

First of all, we want to take a deeper look at the ball indicator, as it doesn't indicate sideslip, despite some call it a "slip indicator".

Transversal balance

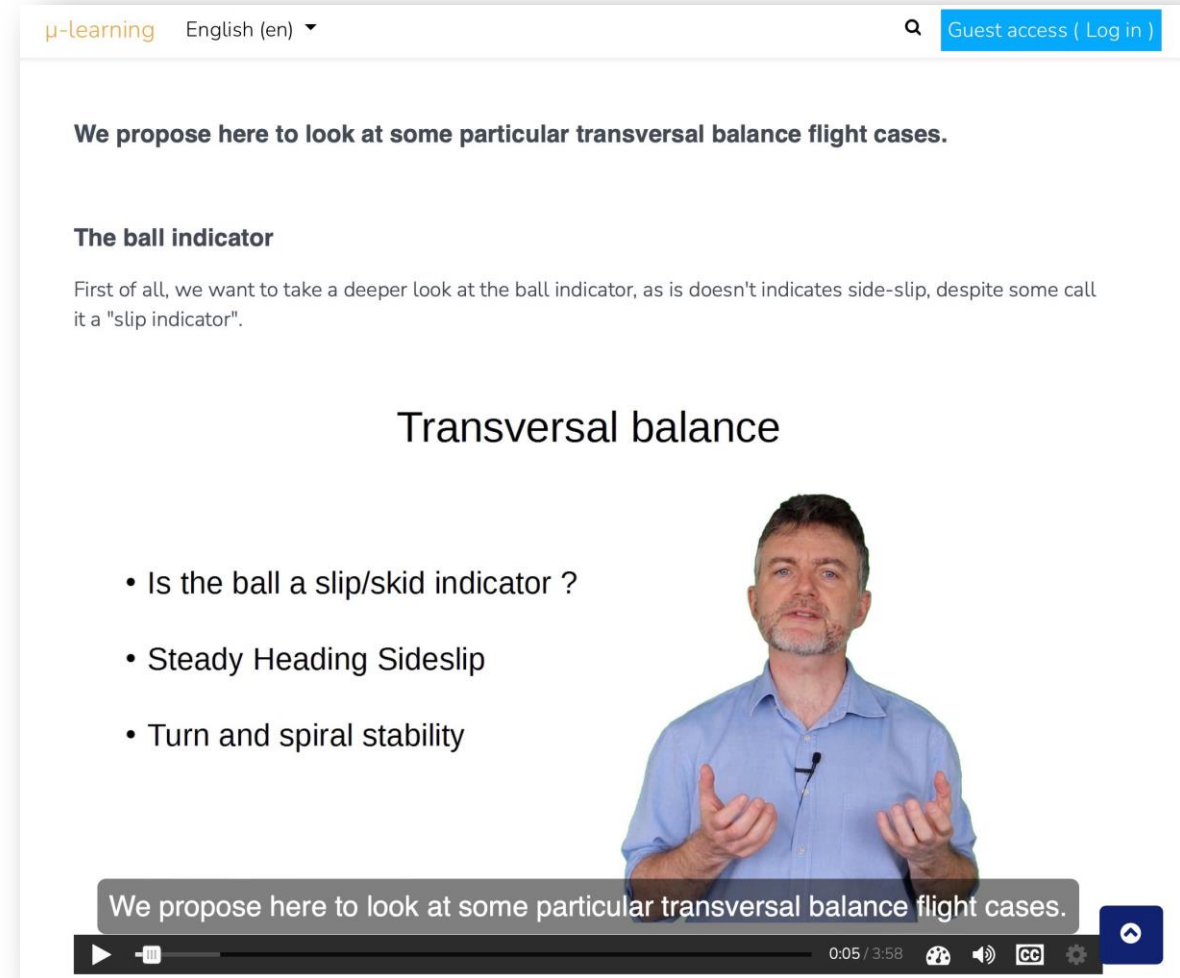

- Is the ball a slip/skid indicator ?
- Steady Heading Sideslip
- Turn and spiral stability

We propose here to look at some particular transversal balance flight cases.

0:05 / 3:58

MICROLEARNING

- *Self paced personal learning modules*
- *Accessible anytime/ anywhere*
- *Clear learning objectives*
- *Includes assessment*

The screenshot shows a web-based microlearning interface. At the top, there is a header with the logo "μ-learning", a language dropdown set to "English (en)", a search icon, and a "Guest access (Log in)" button. The main content area has a heading "We propose here to look at some particular transversal balance flight cases." followed by a sub-heading "The ball indicator". Below this, a paragraph states: "First of all, we want to take a deeper look at the ball indicator, as it doesn't indicate sideslip, despite some call it a 'slip indicator'." The title "Transversal balance" is centered. To the right, a video player shows a man in a blue shirt speaking. To the left of the video, a list of bullet points is displayed: "• Is the ball a slip/skid indicator ?", "• Steady Heading Sideslip", and "• Turn and spiral stability". At the bottom, a video player control bar shows the text "We propose here to look at some particular transversal balance flight cases.", a progress bar at 0:05 / 3:58, and various icons for volume, subtitles, and settings.

MOODLE LMS

- *Shared LMS for the consortium*
- *Single sign on*
- *A lot of support from pedagogical support staff*

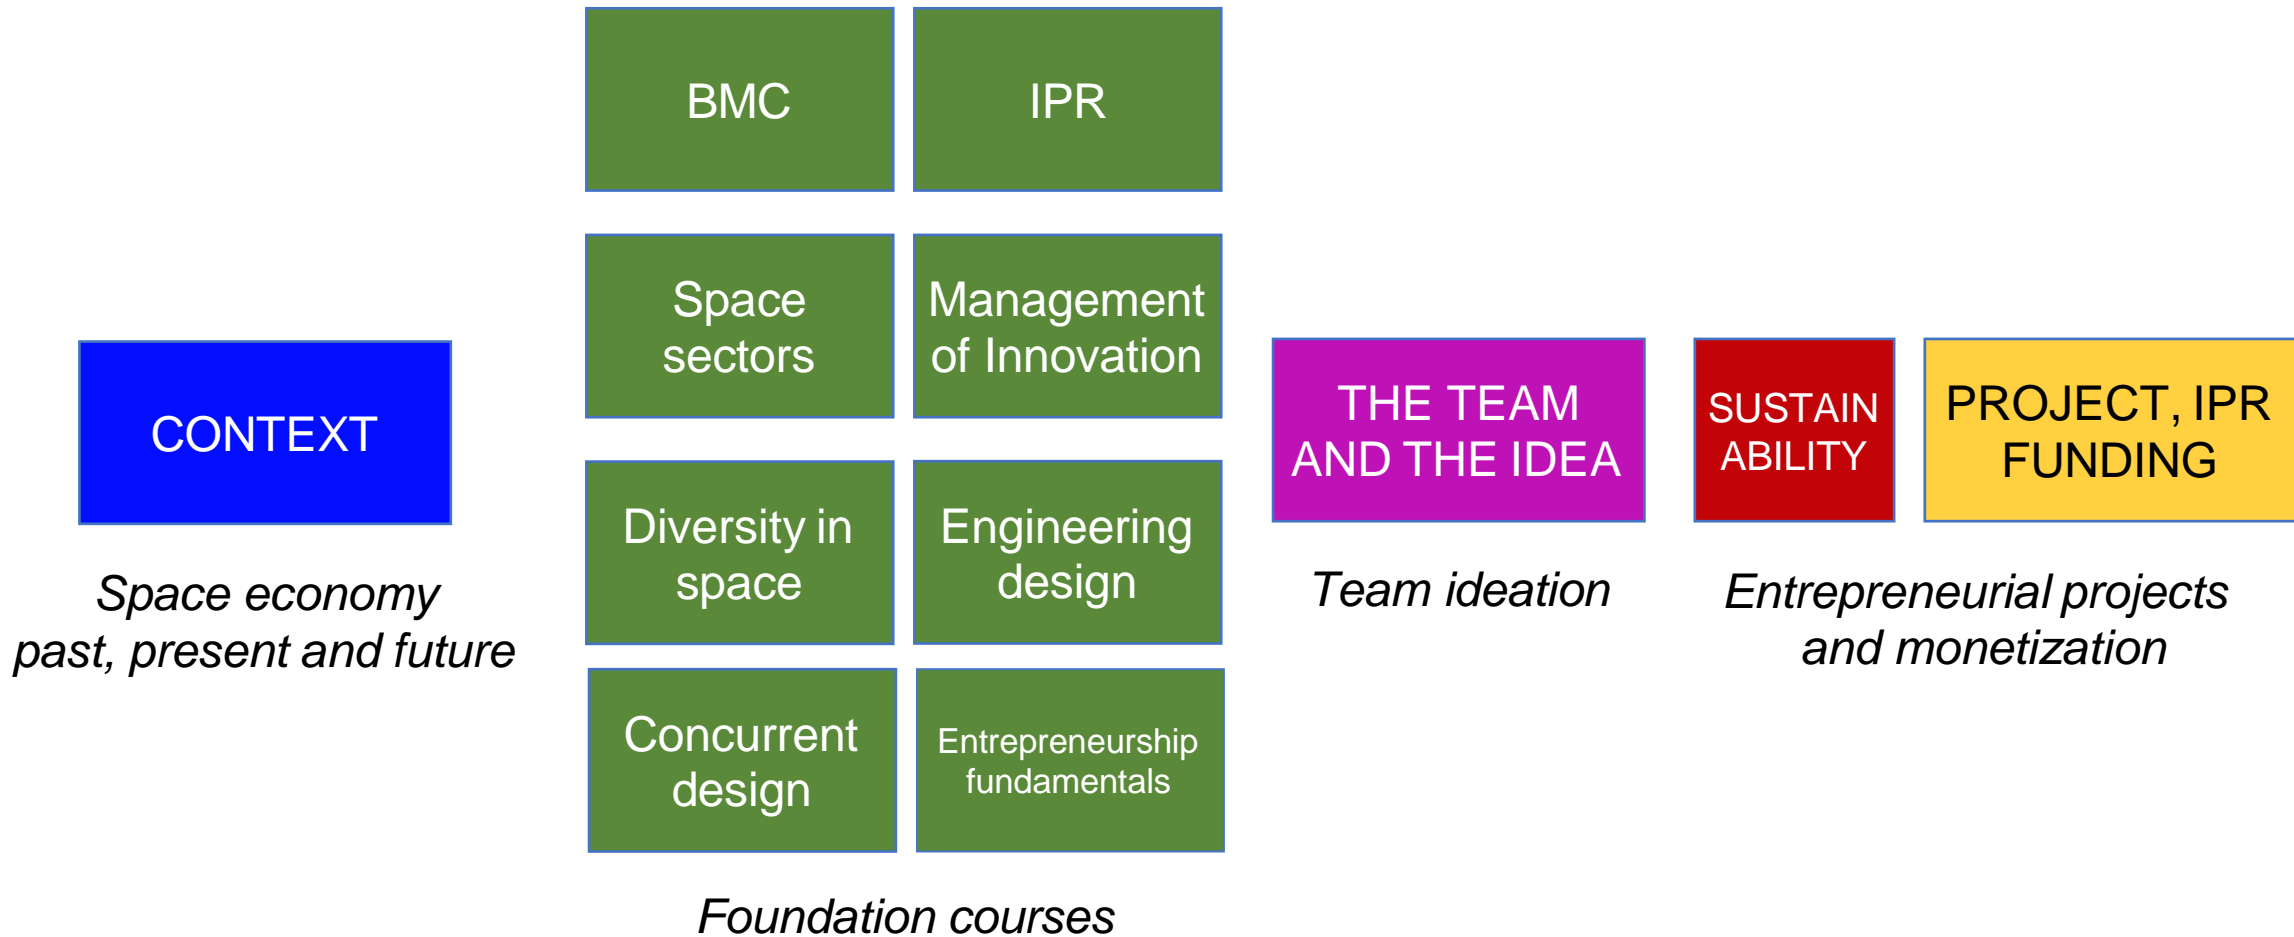

The screenshot displays the Moodle LMS interface. At the top, there is a navigation bar with links for Home, Dashboard, Events, and My courses. The main content area is titled "Available courses" and features four course cards. Each card has a representative image, a title, and a "Course >" button. The courses are:

- Entrepreneurship in...** (Image: Earth from space)
- Space Innovation, ...** (Image: Lunar surface with a rover)
- Satellite Communi...** (Image: Earth from space with a satellite)
- Become an Entre...** (Image: Cash flow diagram with the text "CASH FLOW")

On the right side of the interface, there is a sidebar with the following information:

- 26 Apr, 14:33
- Carolina Sandoval
- Welcome to UNIVERSEH's Moodle!
